

SACRED HEART PODCASTS

Welcome to our Podcasting Pages!

A podcast is a pre-recorded radio-like broadcast, distributed over the internet so that you can listen to it whenever you want to!

Our podcasts enable us to reach a potential worldwide audience with our work. Podcasting also helps us develop our teamwork, ICT, English and Speaking & Listening skills.

Aswell as listening to our podcasts while online, you can also download them to play later on your iPOD or MP3 player!

To begin listening, just select the genre from the sub-menu below - and please do send your comments on our work by filling out the form at the bottom of each page.

If you would like to create your own podcasts at home, you need to download Audacity and export your work as MP3. You will have had to save the Lame encoder somewhere on your computer.
